The REACH EU Chemical Decree

The REACH EU Chemical Decree (registration, evaluation, authorization and restriction of chemicals) regulates, among other things, the use of so-called SVHCs (substances of very high concern) and PAHs (polycyclic aromatic hydrocarbons), which are commonly used in rubber manufacturing.

BKL Electronic knows the relevant requirements on industry and commerce. As a commercial company, we constantly endeavor along with our suppliers to keep improving the properties of our products so they are free of substances that present a risk. According to Article 33 of the REACH Decree (EU) 1907/2006, BKL Electronic is neither a producer nor an importer of these substances, nor brings such substances into contact with their products. Our company imports finished products into the EU. None of these products have a concentration above 0,1 percent by mass leads 33 of the latest ECHA learning list from January 2023.

The above information are given to the best of our knowledge and belief based on information received from our suppliers. This letter is not an extension of the statutory warranties.

If you have more questions, please contact us.
