Your request about PFAS free products

2026-07-22

Dear customer

consumer protection stands at the forefront at BKL Electronic Kreimendahl GmbH. We pay great attention to quality and safety. Therefore, all products within our range are subject to regular quality controls.

Per- and polyfluoroalkyl substances (PFAS) are found both partly in the persistent organic pollutants (POP) and partly in the substances of very high concern (SVHC).

Regulation (EU) 2019/1021 on persistent organic pollutants lays down binding prohibition and restriction measures for certain persistent organic pollutants.

The REACH Candidate List lists the chemical substances which are considered to be of very high concern in the sense of the REACH Regulation (SVHC substance). The list of SVHC substances is published on the website of the European Chemicals Agency (ECHA). <https://echa.europa.eu/candidate-list-table>. You can also obtain additional further information there.

We require our suppliers to comply with the restrictions on the manufacture, placing on the market and use of substances and mixtures set out in Annex XVII of the REACH Regulation.

According to the information currently available to us, we confirm to the best of our knowledge that the substances listed in Annexes I and II of the above-mentioned POP Regulation are not used and that our products do not contain any corresponding materials listed as SVHC in the REACH Candidate List. Any exceptions will be and are marked accordingly by us.

Should you have any further questions, please do not hesitate to contact us.

Your BKL Team
